# BOUCHACHI MOHAMED MEHDI

Software Engineer | Full-Stack Web Developer

+213 667 284 306
mehdibch.dev@gmail.com
Blida, Algeria | github.com/MehdiBouchachi

## PROFESSIONAL PROFILE

Full-stack and front-end developer experienced in React, Next.js, production website delivery, API integration, and IoT-connected platforms. Combines software engineering, team leadership, and hands-on server deployment and recovery configuration.

## EDUCATION

**Master 2 - Software Engineering** | University of Blida 1 (Saad Dahlab) 2025 - Present

**Licence - Information Systems & Software Engineering** | University of Blida 1 (Saad Dahlab) 2022 - 2025

## PROFESSIONAL EXPERIENCE

**Freelance Web Developer** 2023 - Present

- Developed responsive websites and web applications using React / Next.js, with API and database integrations, client requirements gathering, and deployment.
- Deployed a live Next.js project on Windows Server 2012 behind Nginx; configured automatic application restart after crashes and startup recovery after power restoration.

**Software Engineer - AeroLab (IoT & Web Platform)** June 2025

- Built a multi-tenant platform for monitoring and managing automated aeroponic systems, including permissions, dashboards, and device communication over MQTT / ESP-NOW.

**Front-End Team Lead & React Instructor - IT Community** 2023 - 2024

- Led front-end projects, taught React, guided members through practical tasks, and provided mentoring and code reviews.

## SELECTED PROJECTS

**EmpreinteFlex | E-commerce Website**

- Built a responsive Next.js mattress storefront with product discovery, product data management, and Supabase-backed services; managed production hosting.

**ITC Website | Community Platform**

- Developed and maintained website interfaces for IT Community, focusing on reusable components, responsive design, and deployment workflows.

**ITCP | Competitive Programming Tournament Platform**

- Designed a team-based coding competition platform with tournament rounds, coding challenges, submissions, judging workflows, and organizer management.

**Healance | IoT Emergency Response Platform**

- Co-developed an accident-response concept linking simulated smart-bracelet detection, SOS/location alerts, hospital workflows, and LDX emergency health records.

**Equester Club | Desktop Management App (2021)**

- Built a desktop application for member records, basic payments, and scheduling.

## TECHNICAL SKILLS

**Front-End:** React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, GSAP

**Back-End & Data:** Node.js, NestJS / Express fundamentals, REST APIs, Supabase, PostgreSQL, MySQL, MongoDB

**Infrastructure & Tools:** Nginx, Windows Server 2012, production deployment, Git / GitHub, Docker, Figma

**IoT & Systems:** MQTT, ESP-NOW, microcontrollers, API/device integration, fault-tolerant workflows

**Languages:** Arabic (native), English (professional working proficiency)

## HACKATHONS & LEADERSHIP

**Inaugural Huawei Hackathon | Top 2 Finish**

- Achieved a Top 2 result in the first Huawei Hackathon, applying problem-solving and teamwork in a technology challenge.

**ITCP Event | Coach** 2024 & 2025

- Coached participants during two editions of the ITCP competitive programming event.

**SolveX 3.0 Hackathon | Participant** 2026

- Participated with Healance, a smart-bracelet and IoT software concept for road-accident emergency response.
